MUHAMMAD ABDULLAH RASHEED

AI Engineer | Generative AI & Agentic AI

Lahore, Pakistan | +92 319 3425304 | abdullahrasheed1022@gmail.com | linkedin.com/in/abdullah-rasheed1 | https://github.com/abdullahrasheed102

PROFESSIONAL SUMMARY

BS Artificial Intelligence graduate with two AI engineering internships (2025, 2026). Built a 7-agent CrewAI system that classifies job and project descriptions and matches them against developer skills, and a 3D mesh / point-cloud processing and visualization proof of concept. Python, Pandas, NumPy, Scikit-learn, LLMs, prompt engineering, and agentic workflows (LangChain, CrewAI). Seeking entry-level AI Engineer, Generative AI, and ML roles.

TECHNICAL SKILLS

Languages: Python
Generative AI & Agents: LLMs, Prompt Engineering, Agentic AI, Multi-Agent Systems, CrewAI, LangChain, Gemini API, Hugging Face, RAG
Machine Learning: Scikit-learn, Supervised & Unsupervised Learning, Model Training and Evaluation, Deep Learning, NLP
Data & 3D Data: Pandas, NumPy, Matplotlib, Data Preprocessing, EDA, Mesh and Point-Cloud Data, Segmentation
Tools & APIs: Git, GitHub, Jupyter Notebook, REST API Integration

PROFESSIONAL EXPERIENCE

AI Engineer Intern — Deep Cognitive Solutions
Mar 2026 – Sep 2026

3D Data Processing & Visualization Proof of Concept

- Developed a proof of concept for processing 3D mesh and point-cloud data, including segmentation.
- Designed a storage schema for 3D meshes and point clouds.
- Built a minimal frontend to visualize color overlays on processed 3D data.
- Wrote Python data-processing components using NumPy and Pandas.

Tech Stack: Python, NumPy, Pandas, Three.js,

AI Engineer Intern — Mindrind (SMC-Private) Limited
May 2025 – Aug 2025

Multi-Agent Job & Project Matching System

- Built a 7-agent CrewAI system that classifies user input as a Job Description or Project Description and extracts required skills and experience.
- Implemented matching of extracted requirements against developer skills and experience, giving apply / don't-apply recommendations for jobs and feasibility assessment for projects.
- Added project time (hours) estimation and generation of relevant job and project details.
- Used LangChain and CrewAI for multi-step agent orchestration with third-party API integration, and ran iterative prompt-engineering evaluations to improve response quality.

Tech Stack: Python, CrewAI, LangChain, LLMs, Gemini API

SELECTED PROJECTS

AI Instagram Post Generator
[GitHub]

Recreates an Instagram post with an AI-generated image, caption, and hashtags

- Built a tool that takes an Instagram post link, downloads the post, and generates a similar post image using a Hugging Face model.
- Integrated the Google Gemini API to generate a caption and hashtags for the new post.

Tech Stack: Python, Langchain, Gemini API, Hugging Face API

Nova AI Virtual Assistant — Final Year Project

Voice-controlled assistant with multi-language support

- Built a Python voice assistant combining speech recognition and text-to-speech for hands-free command execution.
- Implemented intent recognition and command execution, integrating Google Translation APIs for multi-language interaction.

Tech Stack: Python, Speech Recognition, Text-to-Speech, Google Translation API, Hugging Face API

EDUCATION

BS Artificial Intelligence, The Islamia University of Bahawalpur, Pakistan 2021 – 2025 | CGPA: 3.18/4.00
Relevant Coursework: Machine Learning, Deep Learning, Statistics and Probability. Final Year Project: Nova AI Virtual Assistant.

CERTIFICATIONS

Python: Master Programming and Development with 15 Projects (Udemy) | Python for Data Analysis: Pandas and NumPy (Coursera) | Data Visualization and Storytelling in Python (Coursera) | AI For Everyone (Coursera)
