MUHAMMAD ABDULLAH RASHEED

AI Engineer | Generative AI · LLM Applications · Agentic AI · Python

Lahore, Pakistan | abdullahrasheed1022@gmail.com | abdullahrasheed.tech
linkedin.com/in/abdullah-rasheed1 | github.com/abdullahrasheed102

PROFESSIONAL SUMMARY

AI Engineer with a BS in Artificial Intelligence and hands-on experience from two AI engineering internships and applied projects. Builds practical systems that connect LLMs, data, and APIs: generative AI applications, multi-agent workflows (CrewAI, LangChain), Python backend and REST API integration, computer vision, and 3D data processing.

TECHNICAL SKILLS

Programming & Backend: Python, Python Backend Development, Flask, REST API Integration, Third-Party API Integration

Generative AI & Agents: LLMs, RAG, Prompt Engineering, AI Agents, Multi-Agent Systems, LangChain, CrewAI, Gemini API, Hugging Face

Machine Learning & Computer Vision: Machine Learning, Deep Learning, NLP, Computer Vision, Segmentation, Scikit-learn, NumPy, Pandas, Model Training & Evaluation, Data Preprocessing

3D Data & Visualization: Mesh Data, Point-Cloud Data, Three.js, Matplotlib

Tools: Git, GitHub, Jupyter Notebook

PROFESSIONAL EXPERIENCE

AI Engineer Intern
Mar 2026 – Sep 2026

Deep Cognitive Solutions | 3D Data Processing & Visualization Proof of Concept

- Built a proof of concept for 3D mesh and point-cloud processing, segmentation, and visualization.
- Developed Python data-processing components with NumPy and Pandas for 3D mesh and point-cloud data.
- Designed a storage schema for 3D meshes and point clouds.
- Built a minimal Three.js viewer that renders color overlays on processed 3D data.

Technologies: *Python, NumPy, Pandas, Three.js, 3D Segmentation*

AI Engineer Intern
May 2025 – Aug 2025

Mindrind (SMC-Private) Limited | Multi-Agent Job & Project Matching System

- Developed a multi-agent CrewAI workflow that classifies job and project descriptions, analyzes project requirements, and evaluates job-skill matches. GitHub
- Integrated CrewAI workflows with Flask REST API routes and a React interface (Axios) so users can submit descriptions and view structured results.
- Configured job analysis to compare extracted requirements against developer skills and return matched skills, gaps, a verdict, and follow-up questions.
- Added a Serper search tool to support agent-driven skill research.

Technologies: *Python, CrewAI, Flask, React, Axios, SerperDevTool*

PROJECTS

AI Instagram Post Generator
Generative AI

Python, LangChain, Gemini, Hugging Face | github.com/abdullahrasheed102/post-generator

- Built a LangChain agent that extracts public Instagram post metadata, analyzes the image with BLIP, and prompts Gemini for a caption, hashtags, and an image prompt.
- Generated new images with FLUX.1-dev through the Hugging Face Inference API, and added terminal approval and Instagram upload tools to the workflow.

Technologies: *Python, LangChain, Google Gemini, Hugging Face Transformers, Hugging Face Inference API, Selenium, BeautifulSoup, Pillow, Tavily, instagrapi*

NOVA AI Virtual Assistant

Final-Year Project

Python, PyQt5, SpeechRecognition, pyttsx3 | github.com/abdullahrasheed102/Nova-AI-FYP

- Built a PyQt5 desktop voice assistant with microphone speech recognition, spoken replies, and phrase-based command routing.
- Implemented spoken commands for web search, weather, media playback, and system actions, with translation helpers via googletrans and mtranslate.

EDUCATION

BS Artificial Intelligence

2021 – 2025

The Islamia University of Bahawalpur, Pakistan | CGPA: 3.18 / 4.0

Relevant coursework: Machine Learning, Deep Learning, Statistics and Probability.

Intermediate

2018 – 2020

Punjab Group of Colleges, Jahanian Campus | 862 / 1100

CERTIFICATIONS

- Python: Master Programming and Development with 15 Projects, Udemy
- Python for Data Analysis: Pandas and NumPy, Coursera
- Data Visualization and Storytelling in Python, Coursera
- AI For Everyone, Coursera
